

Communication between designer and not-a-designer

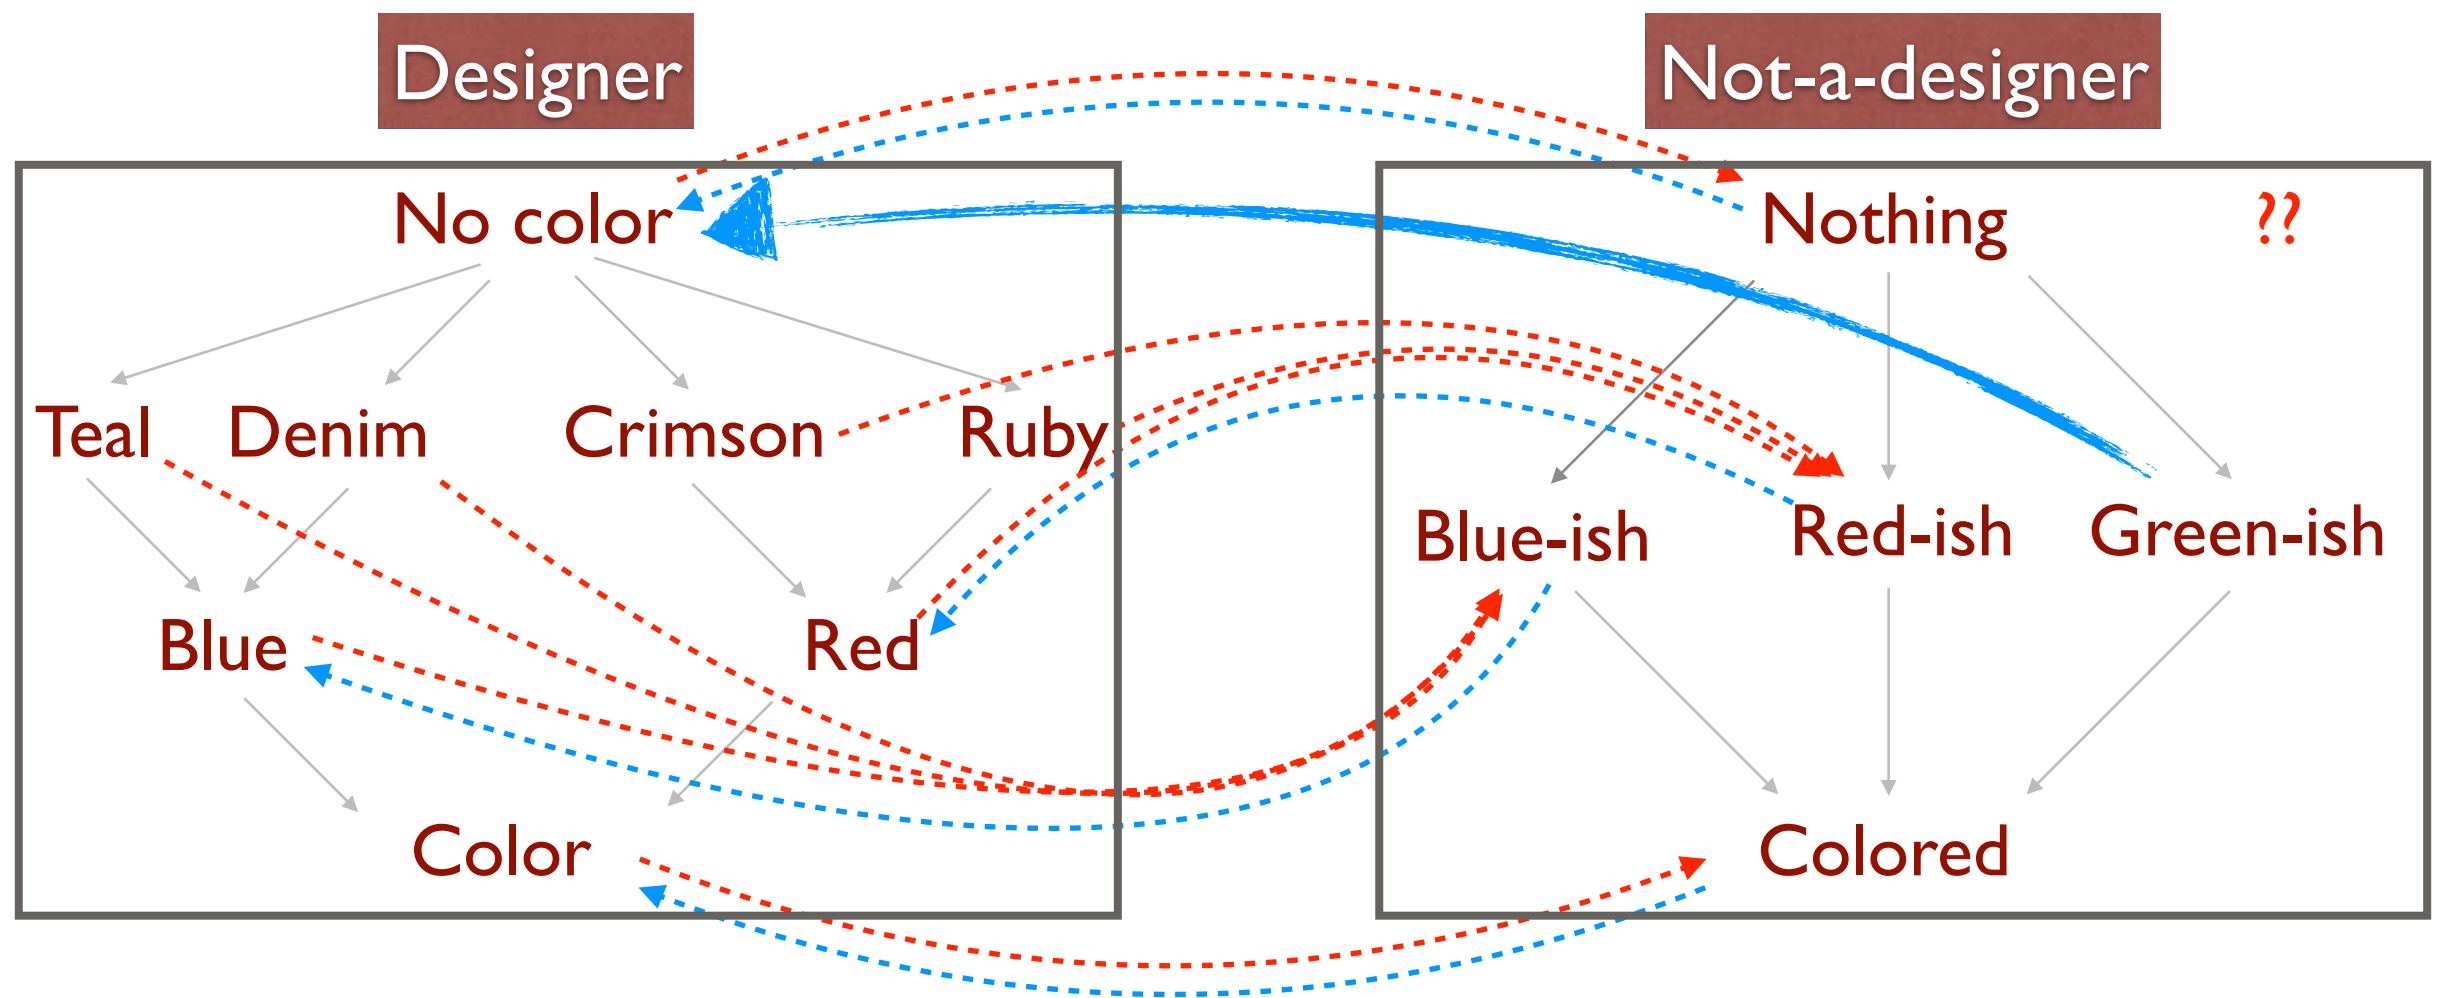

Designer

Not-a-designer

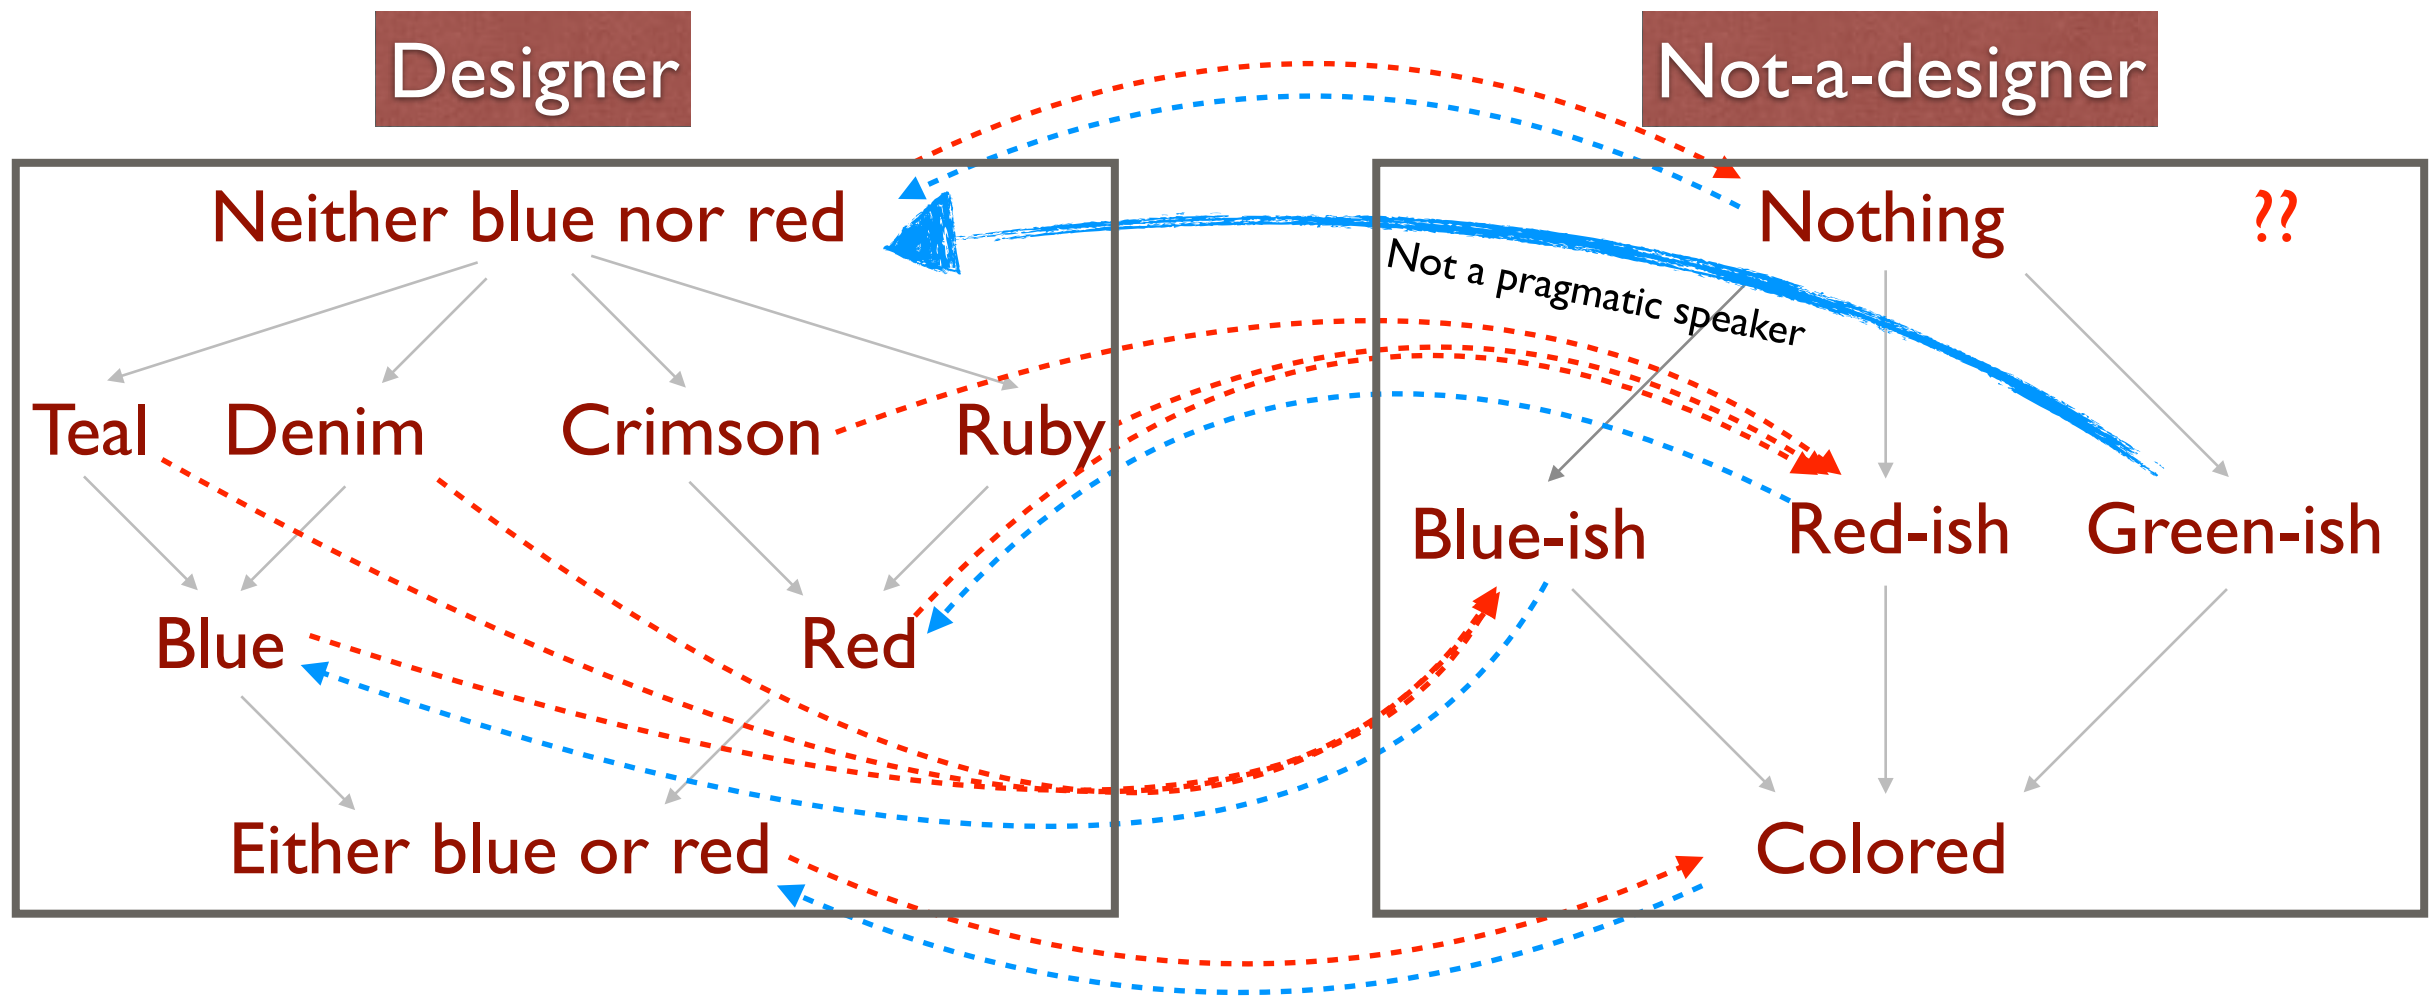

Pragmatic speaker, Not a Galois connection

Not a pragmatic speaker, Galois connection

If we interpret “No color” as “neither blue nor red” and “Color” as “Either blue or red”, then the speaker remains pragmatic. So enforcing Galois connection basically enforces the speaker to interpret “No color” and “Color” in their own way.

Pragmatic speaker, Galois connection
